

I'd like to know if radio station wjjl my families radio station will be granted a new license after 2006. not only does the licensee MJ Phillips Communications have violations between the existing community of license the had a practice of acquiring copywrite and ignoring all laws pertaining to section 47 and the communications act of 1934. some people are law abiding citizens wether foriegn or born.they are not. i feel sorry for the citizens of niagara falls, ny and deeply apologize for my family as to how these people first aquired the station except through money which was never transpired by my self or any member of my family. if this matter with their claim that i be aterrorist because they are supposed to be teaching me how to run a radio stationthen i think that there should be no laws pertaining to rulings on people who can run a radio station regardless of training and there should be no regulations to anybody in any telecommunications media not to file any licensure and to not have any staffs nor community laws pertaining to safety and quality of life. MJ Phillips have broken so many employment laws, technical laws and rulings laws that if there are no sanctions against them then i think that the fcc should shred all of their rule books, lock the door and go home. MJ Phillips communications which i have NO part of except there was no filing for an auction or other papers filed to prove ownership of the existing call letter authorization to do business with the original people who started the station talk about frivioulous filings why is there no public record with the fcc on their aquirement of the station? Why didn't one of the owners Mr.Westberg file the fire report that burnt down the station use his name to sign the fire report? Because they didn't own it. at least i can appeal because the fcc taught me how to file the aquisition papers to start a station in niagara falls and maybe put wjjl in further limbo through competition.
